"Mouse Tspan-5 cDNA cloning.";
Submitted (JAN-1999) to the EMBL/GenBank/DDBJ databases.
-!- SUBCELLULAR LOCATION: Integral membrane protein (Probable).
-!- SIMILARITY: Belongs to the tetraspanin (TM4SF) family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                          tch 69.0%; Score 885; DB 1; Length 268; al Similarity 79.9%; Pred. "Tetraspan protein CD151: a common target of mood stabilizing drugs?";
Neuropsychopharmacology 25:729-736 (2001).
-! SUBCELLULAR LOCATION: Integral membrane protein.
-! SIMILARITY: Belongs to the tetraspanin (TM4SF) family.
                                                                                                                                                                                                                          18 KYFLFGFNIVFWVLGALFLAIGLWAWGEKGVLSNISALTDLGGLDPVWLFVVVGGVMSVL

"Generation and initial analysis of more than 15,000 full-length
human and mouse cDNA sequences."

Proc. Natl. Acad. Sci. U.S.A. 99:16899-16903(2002).

-!- SUBCELLUIAR LOCATION: Integral membrane protein.

-!- TISSUB SPECTRICITY: NOT SOLELY EXPRESSED IN T CELLS. EXPRESSED IN
ACUTE MYELOCYTIC LEUKENIA CELLS. OF SOME PATIENTS.

-!- DISEASE: Defects in TM4SF2 are the cause of a form of X-linked
non-specific mental retardation (XLMR).

-!- SIMILARITY: Belongs to the tetraspanin (TM4SF) family.

-!- DATABASE: NAME=PROW, NOTE=PROW 1:38-40 (2000);

                                                                                                                                                                                                                                                                                                                                                                                                                                           Shanmukhappa K., Kapil S.;
"CD151/PETA-3, a tetraspanin molecule, interacts with the 3'
untranslated region and partial nucleoprotein gene of porcine
reproductive and respiratory syndrome virus RNA.";
Submitted (JUN 2000) to the EMBL/GenBank/DDBJ databases.
-!- SUBCELLULAR LOCATION: Integral membrane protein.
-!- SIMILARITY: Belongs to the tetraspanin (TM4SF) family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Length 253;

Proc. Natl. Acad. Sci. U.S.A. 99:16899-16903(2002).

-!- SUBUNIT: Interacts with integrins alpha3betal, alpha5betal,
alpha3betal and alpha6beta4, with CD9 and CD181.

-!- SUBCELLULAR LOCATION: Integral membrane protein.
-!- TISSUE SPECIFICITY: Expressed in a variety of tissues including vascular.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Whittock N.V., McLean W.H.I.; defined mapping, and intragenic corganization, amplification, fine mapping, and intragenic polymorphisms of the human hemidesmosomal tetraspanin CD151 gene."; Biochem. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 19, Sequence 1565 Sequence 2, A Sequence 5, A Sequence 5, A Sequence 1, A Sequence 1, A Sequence 1, A Sequence 8, A Sequence 8, A Sequence 2, A Sequence 2, A

Patent No. 6150502

GENERAL INFORMATION:

APPLICANT: Watson, James D.

APPLICANT: Strachan, Lorna

APPLICANT: Strachan, Matthew

APPLICANT: Ornust, Rene

APPLICANT: Onrust, Rene

TITLE OF INVENTION: Compositions Isolated From Skin Cells

TITLE OF INVENTION: and Methods For Their Use

TITLE OF INVENTION: Compositions 1001c1

CURRENT APPLICATION NUMBER: US/09/188,930A

CURRENT PILING DATE: 1998-11-09

NUMBER OF SEQ ID NOS: 348

SOFTWARE: FastSEQ for Windows Version 3.0

SEQ ID NO 62

LENGTH: 339
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Score 95; DB 3; Length 399;

Sequence 8, Application US/08705771

GENERAL INFORMATION:

APPLICANT: Paul Moore, Reiner Gentz, Hongjin Ji,

APPLICANT: Jian Ni and Jing-Shan Hu

TITLE OF INVENTION: Human Genes, Sequences and

TITLE OF INVENTION: Expression Products

NUMBER OF SEQUENCES: 22

CORRESPONDENCE ADDRESS:

ADDRESSEE: CARELLA, BYRNE, BAIN, GILFILLAN,

ADDRESSEE: CARCHI, STEMART & OLSTEIN

STREET: 6 BECKER FARM ROAD

STATE: NEW JERSEY

Patent No. US20020164693A1

GENERAL INFORMATION:

APPLICANT: Shi et al.

TITLE OF INVENTION: TM4SF Receptor Polynucleotides, Polypeptides, and Antibodies
FILE REFERENCE: PTOS6P1

CURRENT FILING DATE: 2001-10-10

PRIOR PLIING DATE: 2001-10-10

PRIOR PAPLICATION NUMBER: 06/195,336

PRIOR PELING DATE: 2000-04-10

NUMBER OF SEQ ID NOS: 8

NUMBER OF SEQ ID NOS: 8

SEQ ID NO 4

LENGTH: 233
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    61 LDPVWLFVVVGGVMSVLGFAGCIGALRENTFLLKFFSVFLGLIFFLELATGILAFVFKDW 120
